

Armored Tracked Dump Truck

The Armored Tracked Dump Truck is a Komatsu model 2600. Its low ground pressure tracks exert 2.2 PSI on soils. The armored cab has .75" of AR572 steel over and above the existing .25" steel cab. Blast resistant glass 2.69" thick overlays the operator's window.

Behind the operators cab .30" up to .50" steel forms the dump bed, in addition to the .75" of AR572 steel.

Below the operator, multiple layers of steel skid plates, frame work and components provide several inches of additional protection.

USACE OMI 1939 Fragmentation Distance, Built to survive unintentional detonation of a 75mm HE, .75 A572 steel armor protection from direct detonations, 2.65" bullet resistant glass armors and protects the cab.
